## NMC Diversity Data

This document presents data about the diversity demographics of:

- Nurses and midwives on the register
- Nurses and midwives who go through fitness to practise processes
- Our FtP panel members.

This document includes data from different functions of the NMC. The terminology used in each section may vary according to the methods of collection and data source. For example, the terms 'race' and 'ethnicity'.

In presenting this data the percentages have been rounded to the nearest whole number or one decimal place. In a small number of cases this means the data may total slightly over/under 100 percent.

Where there are small numbers that could lead to individuals being identified or data that could be considered sensitive that information has not been presented or smaller categories have been collapsed into bigger categories.

## Nurses and Midwives

The register profile in the following tables shows the diversity data of the 690,278 nurses and midwives who were on our register on 31 March 2018. Compared to last year's report there are 495 fewer nurses and midwives on the register.

The first group of tables are broken down into three registration types:

- Midwives (including Midwife SCPHNs)
- Nurses (including Nurse SCPHNs)
- Dural registrants (joint Nurse \& Midwives including Nurse Midwife SCPHNs)

Table 01: Breakdown of nurses, midwives and dual registrants on the register

| Midwife | Nurse | Dual registrant | Total |
| :--- | :--- | :--- | :--- |
| 35,830 | 646,637 | 7,811 | 690,278 |
| $5.2 \%$ | $93.7 \%$ | $1.1 \%$ | $100.0 \%$ |

Table 02: Age group numbers

| Age Group | Midwife | Nurse | Dual | Total |
| :--- | :--- | :--- | :--- | :--- |
| $20-29$ | 6,532 | 87,158 | 520 | 94,210 |
| $30-39$ | 9,453 | 137,729 | 1,442 | 148,624 |
| $40-49$ | 8,323 | 176,922 | 2,025 | 187,270 |
| $50-59$ | 9,555 | 187,517 | 3,146 | 200,218 |
| Over 60 | 1,967 | 57,311 | 678 | 59,956 |
| Total | 35,830 | 646,637 | 7,811 | 690,278 |

Table 03: Age group percentages

| Age Group | Midwife | Nurse | Dual | All |
| :--- | :--- | :--- | :--- | :--- |
| $20-29$ | $18.2 \%$ | $13.5 \%$ | $6.7 \%$ | $13.6 \%$ |

## Nurses and Midwives in Fitness to Practise

All the percentages in the tables are column percentages. This means that each registration type is broken down by demographic characteristics, so that we can compare, for example, the age profile of nurses and midwives.

## New concerns

This section details the diversity data for the 4778 new concerns where a case was opened between April 2017 and March 2018. In the same period there were 4 new concerns raised about individuals that were not on the NMC register at the time of the referral (but may have previously been on the register). Therefore these 4 individuals are not reported in the tables broken down by registration type. The figures in this report are in line with the figures in the NMC annual fitness to practise report 2017-2018 which reports on number of referrals as a whole, not by individual, meaning there may be more than one referral for an individual and that individual may present in the data more than once.

Table 16: Age group

|  | Midwife | $\%$ | Nurse | $\%$ | Dual | $\%$ | All | $\%$ |

## Case Examiner decisions

During an FtP investigation, we gather evidence that is needed to make a full assessment to the allegations. At the end of the investigation, the case examiners review all the evidence and decide one of the following:

- No case to answer (NCTA)
- Case to answer (CTA) referred to a hearing
- Advice
- Warning
- Undertakings

The data in this section has not been separated into registration type to prevent individuals being identified by the small numbers. The percentages are column percentages - they show for each demographic group what percentage were NCTA, advice, warnings and undertakings.

Table 30: Age numbers

## Hearings

Some of the diversity data about nurses and midwives that go to hearings is sensitive data under the Data Protection Act and cannot be published in this report to keep these individuals anonymous. This section is not divided into nurse, midwife and dual registration type and is reported by percentage not numbers.

The sanctions that the panels determine are listed below. Go to the Sanctions we can impose pages on our website for more information.

| Sanctions | Acronym |
| :--- | :--- |
| Facts not proved | FNP |
| Fitness to practise not impaired | FTPNI |
| Caution order | CO |
| Conditions of practice order | CPO |
| Suspension order | SO |
| Striking off order | SOO |

## Fitness to practise panellists

For consistency across the protected characteristics in these figures we have combined the 'prefer not to say' category, where someone has actively ticked a box that they do not want to answer the question, with the 'unknown' category, where we have received no response.

Table 53: Age

|  | Number | $\%$ |
| :--- | :---: | :---: |
| $20-29$ | 2 | $0.6 \%$ |
| $30-39$ | 15 | $4.7 \%$ |
| $40-49$ | 48 | $15.2 \%$ |
| $50-59$ | 137 | $43.4 \%$ |
